This service allows a subscriber to call another party during an existing call and add this party to the call, creating a three-way conversation.

2. If the third party does not answer or their line is busy, hit the flash-hook twice to rejoin the original call. If you hang up you will receive a ringback reminding you that the original call is still on hold, and can rejoin the call by picking up the phone. This service is known as Three Way Calling Ringback.

Caller ID Service

This service displays the Number of the incoming caller on the subscriber's telephone, if the subscriber's phone has a Caller ID Display screen or Caller ID Display unit. Refer to your telephone equipment user manual to verify the availability of Caller ID functionality.

CALL FEATURES

Call Waiting (With Caller ID)

1. When you hear a Call Waiting tone during a call, hit flash-hook to swap between the callers. If you hang up while a call is still on hold, you will receive a ringback reminding you to reconnect the call.

Note: To disable call waiting for the next call only, press *70 before the call

Simultaneous Ring (SimRing)

This service allows up to 4 phones to ring at one time. When the call is picked up either by the customer or voicemail, the other phones stop ringing. At least one of the phone numbers must have service provided by Cable partner service.

Call Hold

Call Hold allows you to place a caller temporarily on hold. To put a caller on hold will require you to have a compatible telephone handset with a corresponding Call Hold Button.
